/18/20	Formal Mooring Buoys	Harbormaster	x					Upgraded Recreation resource	3	Four Mooring buoys broke this year because the mooring users are attaching their lines to the top of the float. These buoys were taken from the beach ropes as a temporary solution. Trained/experience boaters know to hook to the shackle below the float and all users have been notified. The right solution for these less experienced boating customers is to use buoys with a pass thru hole bringing the shackle to the top for easy attachment. The current lines From the anchors to the shackles are now Syrs old and need replacement before one lets go and a boat is damaged. This project would replace the anchor lines with chains, the buoys to 12,Aù thru hole floats making the mooring field look and function more professionally and safely.	n 5	\$ 3,500	\$	100) X						x		Mooring System'IA
/18/20	Completion of Town Docks	Harbormaster	x					Upgraded Recreation resource	6	The town docks are half complete are require manual installation/removal each year by the Harbormaster. One half of the town docks are wooden docks build by BHRA along with some old Äúpillow,Äù floats. Both halves are secured in the water with galvanized poles that are screwer in by the Harbormaster. This work is difficult and the water is very cold. This project would buy the 2nd half of dock floats (low for crew & other use) and replace the pole method with a permanent method to secure the floats.	d	\$ 15,000	\$	100) X	X	x				x		<u>Manta Ray</u>
/18/20	Upgrade Boat Rental Kiosk	Harbormaster	x					Upgraded Recreation resource	12	Two upgrades are needed for the successful Boat Kiosk Recreational Resource. The 1st is automation between GwicREC and the Key Cabinet so that the registration doesnÅdt have to manually transferred to the kiosk. This is dependent on the Harbormaster or P&R volunteers and can cause a delay that is extremely disappointing to the customer that registers and wants to boat. The 2nd upgrade is to add magnetic locks to some or all of the keys. They are electronicall secured and we know who takes a key, but there are some critical keys we need physically secured like the boat house, town boat and town common keys. This would be an upgrade from the key cabinet manufacturer.	d Iy	\$ 5,000	\$	100) X								<u>Kiosk Automation</u>
/13/20	Bench Donation	Jessica Fish					x	Addition/Changes to current program(s)	3	My brother Rob Hult a longtime Harvard resident recently passed away from a brain tumor. Before his illness, he was a frequent trail runner and avid mountain biker in town. His tumor quickly had him in a wheelchair but through hard work, we were able to get him to use his walker and cane on some of the trails in town. The trail behind the track was one of our favorites as we could push the wheel chair through no bad days and stroll along with a cane on good days. The last "hill" back up to the parking lot always gave him a hard time and we would perch on the rock to take a break. I would like to donate a simple, natural looking granite bench to place in that area. It will not be engraved as a memorial bench (he was not a fan of those.). There is an old wooden pole on the right side as you head back up to the parking lot that looks of a possible bench(no name) and the spot on the trail but I am open to suggestions if you have different bench or location that would blend in better. I will be responsible for everything, cost of bench/installation etc. and can meet with you on site if you'd like.	d n co	5 -	\$	-							X		Memorial Bench'lA
